Gastón Palavecino

Senior Software Engineer | .NET | GenAI & Agentic Systems | Full Stack

gastonpalav@gmail.com • linkedin.com/in/gaston-palavecino-4071003b4 • gastonpalav.com.ar • Victoria, Entre Ríos, Argentina

SUMMARY

Senior Software Engineer with 8+ years of experience building software solutions across the Microsoft ecosystem, from .NET Framework to .NET 10. Strong background in backend and full-stack development, software architecture, REST APIs, enterprise system modernization, Azure, and DevOps practices. Hands-on experience building GenAI solutions, including conversational agents with persistent memory, streaming, RAG pipelines, and multi-agent orchestration, as well as AI-powered automation platforms using Claude for real clients.

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer — 4Points Consulting | *Sep 2022–Present*

- Develop and maintain enterprise applications using .NET 10, C#, React/Next.js, SQL Server, and Azure services.
- Design and implement REST APIs and backend services; contribute to backend architecture decisions and performance improvements.
- Modernize legacy applications by migrating solutions from .NET Framework to .NET 10, including integrations and background services.
- Build and maintain a health insurance management system handling sensitive member and billing data, with Keycloak authentication and role-based access control.
- Work with CI/CD pipelines, DevOps practices, code reviews, and agentic development workflows using Claude Code and Cursor.

.NET Developer — Mainset S.A.S | *2019–2022*

- Developed and maintained enterprise applications using WCF, WPF, ASP.NET, Angular, SQL Server, and Oracle.
- Implemented custom solutions, integrations, and ongoing maintenance for enterprise clients.

.NET Developer — COA S.A | *2018–2019*

- Maintained and developed internal systems using ASP.NET, C#, VB.NET, WinForms, and SQL Server.

SELECTED PROJECTS & FREELANCE

AI Service — Personal Agent Platform

- Built conversational agents with persistent memory and streaming responses, without relying on third-party agent frameworks.
- Implemented a RAG pipeline with a vector database to retrieve relevant context and orchestrated multiple specialized agents.

Publica — AI-Powered Marketing Automation

- Developed a marketing automation platform using Claude to generate content for a real business.
- Implemented background processing with Hangfire, retry policies with Polly, and Clean Architecture on .NET 10.

Language Institute — Student Management & WhatsApp Communication Platform | *Freelance · Sep 2026–Present*

- Co-developed a serverless student registration platform with Moodle enrollment and a bulk WhatsApp campaign workflow (Meta Cloud API). Stack: TypeScript, Cloudflare Workers, D1, Queues, Vitest, GitHub Actions.

VeterinarIA — SaaS for Bovine Reproductive Analysis

- Automates case reporting by transcribing field audio with Whisper and extracting information from documents and images using OCR.

Cattle Detection with YOLOv8 — Computer Vision

- Custom-trained a YOLOv8 model with OpenCV to count cattle heads in video.

Pilates Studio Management Platform

- .NET 10 backend with unit and integration tests, React/Next.js frontend, and a React Native app published on the App Store; used by 180 active students.

TECHNICAL SKILLS

AI & Agents: GenAI, LLMs (Claude, OpenAI, Azure OpenAI), prompt engineering, system prompts, tool/function calling, Semantic Kernel, MCP, RAG, embeddings, vector databases, multi-agent orchestration, conversational memory, streaming, OCR/Whisper, YOLOv8, OpenCV.
Agentic Coding: Claude Code, Cursor, OpenCode, Spec-Driven Development (SDD) with Superpowers.
Backend: C#, .NET Framework–.NET 10, ASP.NET Core, REST APIs, WCF, Entity Framework, Hangfire, Polly, unit and integration testing.
Frontend: React, Next.js, Angular, WPF, React Native, TypeScript, Streamlit.
Cloud & DevOps: Azure, Azure OpenAI, Azure AI Search, Document Intelligence (hands-on labs), Azure AI Foundry (knowledge), CI/CD, DevOps, GitHub Actions, Docker.
Data: SQL Server, PostgreSQL/pgvector, Oracle, MongoDB, Cosmos DB (NoSQL), vector databases.

EDUCATION

B.Eng. in Artificial Intelligence — Universidad de Palermo · 2026–Present
B.Eng. in Systems Engineering — Universidad Tecnológica Nacional, Rosario · 2013–2018

LANGUAGES

English: Upper-Intermediate
